Session 1

First session 26/08/2023

Presenters:

- Mr.Alireza Tajalli
- Mr.Ali Mousavi

At first Mr.tajalli spoke about sessions roadmap , course syllabes and evaluation criteria to reqruitment at the end of course.

After he told us about company history and the way that company passed to be in this situation. He told us about Dev-ops team and Network team and roles in these groups.

Afterall Mr.Mousavi spoke about free software and open source , their meaning , their diferrent and their history and the start of linux and GNU projects in 1980' and 1990' decades.

After that Mr.Tajjali wanted to divide into groups and think about the idea and minimum persons that you want to reruit to be in roles in the starting of an startup company.

I thought about that and I told about a company that its idea is detecting leak in gas pipes with airdrones. I added that this company'minimum persons to start its activating are:

- A full-stack developer to do backend and frontend of application
- An image proccessing specialist
- An AI speciallist
- A Data Analyser
- A Database specialist
- A person to check in place to confirm data

Afterall we had a fuuny quiz in Kahhot App and I took second place in ranking
